

# COVID-19 SCREENING & TESTING

**GREAT LAKES MEDICAL LABORATORY** CURRENTLY OFFERS SEVERAL TESTING OPTIONS FOR COVID-19 THAT IDENTIFY IF INDIVIDUALS ARE INFECTED - OR MAY HAVE BEEN INFECTED - WITH COVID-19

## TESTING WE PROVIDE

- COVID-19 PCR testing (swab test)
- COVID-19 Antigen test (swab test)
- Respiratory Panel (RP) tests for a comprehensive set of 21 respiratory viral and bacterial pathogens to rule out COVID-19 infection (swab test)
- COVID-19 Rapid Antibody (Igg/Igm) testing (single-step reagent strip method)
- COVID-19 Serologic laboratory testing for (IgA/IgG/IgM) antibodies
- Additional blood testing which may help monitoring COVID positive patients
- All tests require Authorized Healthcare Professional's lab order

## OUR SERVICES

We use state-of-the-art instruments and sophisticated technologies to rapidly test, diagnose and provide faster turn-around time for results. Our laboratory operation has expanded its capability to test more vulnerable populations such as nursing home and assisted living patients and employees, and we provide the COVID-19 sample collection and testing for homebound and non-hospital inpatients. This will assist in helping facilitate the testing of homebound individuals and those unable to travel.

We also provide on site COVID 19 screening and testing services to help the businesses safely re-open.

We bill all insurances for these tests if individuals have active insurance, and bill HHS for testing uninsured individuals.
